

Agustín Iriarte Walton/ Active Member

He was born in Santiago de Chile. Initially, he studied Biological Sciences at the University of Chile. Later on he did a Masters in Ecological Sciences degree at the University of Florida, Gainesville, USA. He was always fascinated to study ecological aspects in carnivores, first in foxes and then he focused on felines. Since 1999, he studied the ecology and conservation of the Andean cat in different areas of Chile. At the end of that year he participated in the creation of the AGA. In these 20 years he has participated in numerous scientific projects to increase the knowledge of the Andean Cat. He has published about 50 scientific articles, 30 chapters of books and popular articles and 14 books. He is a strategic partner of the Center for Applied Ecology and Sustainability (CAPES-UC). He is currently general manager and partner of the consulting firm Flora y Fauna Chile.
